INT-CL (IPC): B60K011/02 , B60K011/08 , B62K011/00

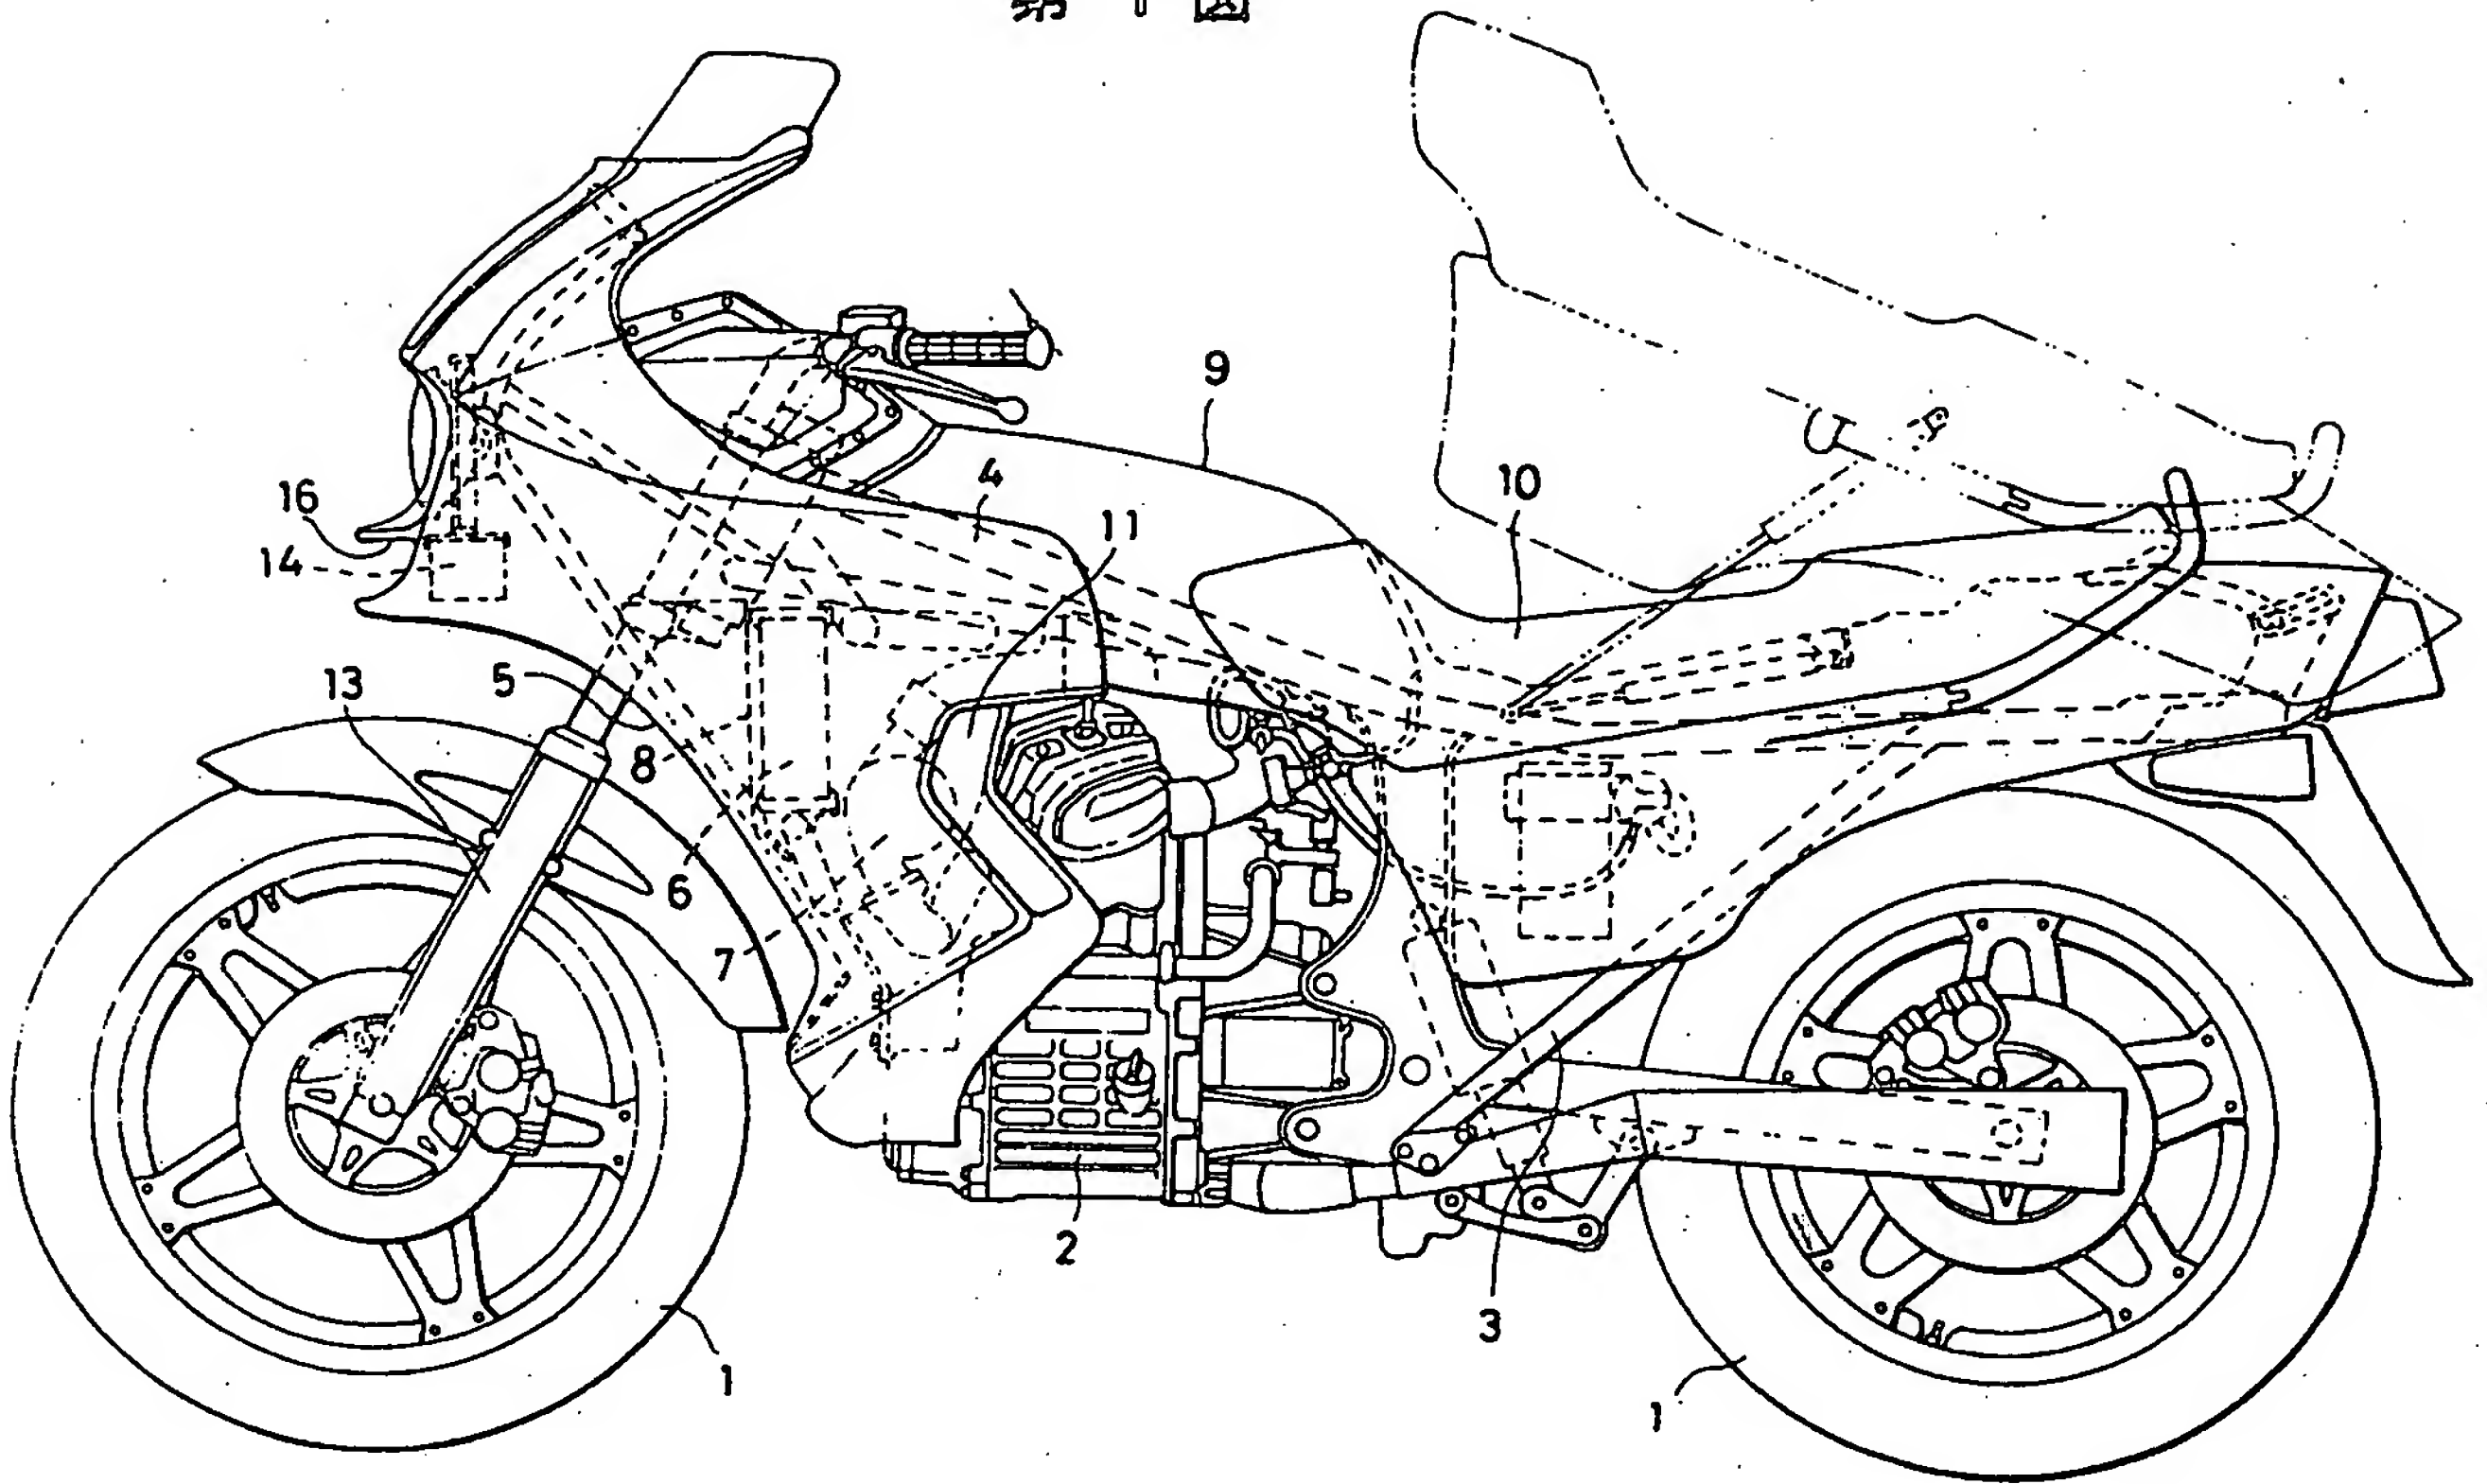

ABSTRACT:

PURPOSE: To provide sufficiently cool wind by forming a cooling air intake having vertically wide width and provided with a grill for a radiator and high temperature parts.

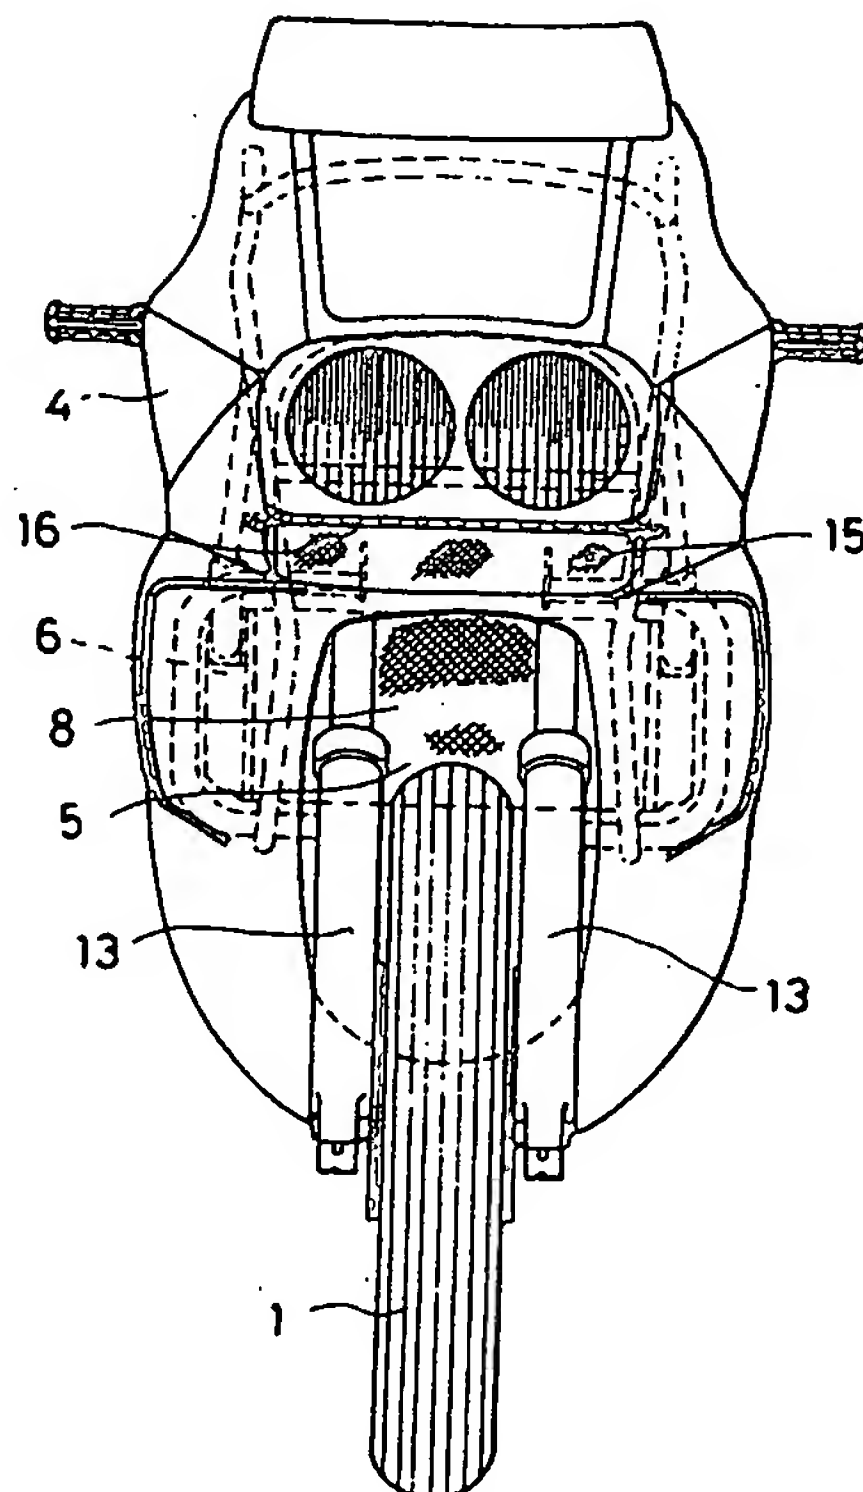

CONSTITUTION: A fairing 4 is formed over the front surface of a radiator 6 and high temperature parts such as turbo-charger 7, etc. with a large width opening 5 provided with a gauze-shaped grill 8. Since the long opening 5 has a large width extending the respective front faces of the radiator 6 and high temperature part 7, sufficient cooling air can be provided while the grill can prevent the intrusion of gravel and others.
